PROFILE

Software Engineer and Front-end Specialist with over 10 years of experience in developing high-performance web and mobile applications using JavaScript and TypeScript. Highly skilled in React.js, Next.js, and React Native for building fast and scalable applications. Familiar with backend frameworks, implementing Rest and GraphQL APIs, and utilizing CI/CD systems for deployment and release automation. Experienced in leading large-scale projects with millions of global users, employing Agile methodologies to create scalable systems while adhering to the latest software architecture patterns and leveraging cutting-edge technologies.

PROFFESSIONAL EXPERIENCES

Frontend Engineer *(August 2019 - PRESENT)* *ALEPH LABS, Malaysia (www.aleph-labs.com)*

- Developing and debugging Single Page Applications (SPA) and Progressive Web Applications (PWA) using React.js and Next.js.

- Building cross-platform mobile applications using the React Native framework.

- Creating and implementing design systems based on Atomic Design principles.

- Leading the front-end team, conducting code review sessions, and mentoring junior developers through training sessions.

- Extensive experience in banking projects and internet banking, collaborating with leading international banks across Asia and worldwide.

Accomplishments:

- Developed a new front-end architecture using JavaScript best practices, improving code readability and component reusability by 40%, enhancing site performance, and reducing bundle size and load times by 25%.

- Trained junior developers through knowledge-sharing sessions, leading to a 50% improvement in code quality and a 30% reduction in code review time.

- Successfully delivered a large-scale project on time across 26 sprints, achieving full client satisfaction.

***Tech* Stack:**

TypeScript, React Js, Next Js, React Native, Redux, Webpack, Micro Frontend, Cordova, Rest API, GraphQL, TDD, Jest, React Testing Library, Design System.

Full-stack Engineer *(May 2017-July 2019)* *Kian e-commerce, IRAN*

- *Developing and supporting web portals and websites using Vue.js, React.js, and WordPress.*

- *Developing online store architectures using Vue.js and Laravel.*

- *Managing deployment and hostings*

- *Troubleshooting and optimizing websites*

Tech Stack:

PHP,Laravel,MySQL,JavaScript,Vue JS,Vuex,React Js,Redux,HTML5,CSS & SASS & LESS,Boot Strap,WordPress,Git.

PROFFESSIONAL EXPERIENCES

Full-Stack Developer *(Jun 2012-May 2017)*   *Arian Saeed Industrial Group, IRAN* (www.ariansaeed.com)

- *Design, develop, and debugging the internal automation system.*
- *Develop the IT Group Information System using HTML, CSS, JQuery and PHP.*
- *Develop the HR Department Information System using HTML, CSS, JQuery and PHP.*

Tech Stack:

PHP, HTML, CSS, MySQL, MSSQL Server, JavaScript, jQuery, Ajax, Boot Strap, WordPress.

SKILLS

Web: *React Js, Next Js, JavaScript, Es6, TypeScript, Redux, HTML5, CSS, SASS, LESS, Tailwind CSS, Boot Strap, Material UI, Responsive Design, Vue JS, Vuex, Flux, SPA, PWA, Micro Frontend, WebSocket, socket.io*

Mobile: *React Native, Code Push, Fire Base, Push Notification,*

CI/CD: *Jenkins, App Center, GitHub*

API Integration: *Rest API, GraphQL*

Unit Testing: *Jest, React Testing Library*

Backend: *Nest Js, Express JS, Rest API, GraphQL, PHP, Laravel*

Data Base: *MySQL, PostgreSQL, MongoDB*

Prototyping Tools: *Figma, Zeplin, Sketch, Adobe Illustrator, Adobe XD*

Other technical skills: *Git (version control), Docker, Story Book, JIRA, Confluence, Atomic design, debugging, dev tools, Performance Optimization, CMS, Responsive UI, cross-browser styling, Automated testing, integration*

Soft Skills: *Teamwork, Leadership, Problem solving, Communication skills, Adaptability*

EDUCATION

Degree: *Bachelor of Science in Physics(2008)*

University: *Payame Noor University, Sari*
