

PROFILE

Full-Stack Software Engineer with 12+ years of experience delivering production-grade web and mobile applications across fintech, blockchain, and e-commerce domains. Experienced in React, Next.js, React Native, and NestJS, with hands-on expertise in cloud infrastructure (AWS), CI/CD pipelines, and scalable API design. Known for bridging frontend and backend concerns, leading frontend teams, mentoring developers, and integrating AI-assisted development workflows to accelerate delivery. Proven experience across the full software development lifecycle in fast-paced Agile environments.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer

Bitazza, Thailand | Feb 2024 - Present | www.bitazza.com

- Develop and maintain scalable web and blockchain-based applications, transforming Figma designs into reusable UI components and production-ready user experiences
- Drove AI-assisted development practices using tools such as Cursor, integrating AI into code generation, refactoring, and debugging workflows
- Design and implement RESTful APIs using NestJS and integrate them with frontend applications
- Manage AWS cloud infrastructure, Terraform-based infrastructure as code, and CI/CD pipelines using Bitbucket Pipelines
- Conduct code and pull request reviews to ensure code quality, maintainability, and adherence to best practices
- Collaborate with cross-functional teams in Agile development environments
- Integrate third-party platforms and services, including blockchain and cryptocurrency APIs, Fuse wallet infrastructure, Amity social platform, and Phrase localization services

Accomplishments:

- Implemented AI-assisted development workflows across the team, reducing development and debugging effort by ~25% and accelerating feature delivery cycles
- Integrated Phrase localization services and automated bulk translation workflows, reducing content localization and manual translation time by approximately 60%

Tech Stack:

TypeScript, React, Next.js, NestJS, MySQL, TypeORM, Redux Toolkit, RESTful APIs, WebSocket, AWS, Docker, Terraform, Bitbucket Pipelines, Jest, React Testing Library, TDD, Webpack, Blockchain, Cryptocurrency APIs

● Frontend Engineer

ALEPH LABS, Malaysia | Aug 2019 - Oct 2023 | www.aleph-labs.com

- Develop and maintain Single Page Applications (SPAs) and Progressive Web Applications (PWAs) using React and Next.js
- Build cross-platform mobile applications using React Native
- Create and implement design systems based on Atomic Design principles
- Lead the frontend team, conduct code reviews, and mentor junior developers
- Deliver banking and internet banking solutions for leading financial institutions across Asia and global markets

Accomplishments:

- Developed a frontend architecture based on JavaScript best practices, improving code readability and component reusability by 40%, while reducing bundle size and page load times by 25%
- Mentored junior developers through knowledge-sharing sessions, resulting in a 50% improvement in code quality and a 30% reduction in code review time
- Successfully delivered a large-scale project across 26 sprints on schedule, achieving full client satisfaction

Tech Stack:

TypeScript, React, Next.js, React Native, Redux, Webpack, Docker, Micro Frontend, Cordova, REST APIs, GraphQL, TDD, Jest, React Testing Library, Design System.

● Full-Stack Developer

Kian E-Commerce, Iran | May 2017 - Jul 2019

- Develop and maintain web portals and websites using Vue.js, React, and WordPress
- Design and implement e-commerce solutions using Vue.js and Laravel
- Manage application deployments, hosting environments, and production releases
- Troubleshoot, optimize, and maintain website performance, reliability, and user experience

Tech Stack:

PHP, Laravel, MySQL, JavaScript, Vue.js, Vuex, React, Redux, HTML5, Sass, Less, Bootstrap, WordPress, Git

● Full-Stack Developer

Arian Saeed Industrial Group, IRAN | Jun 2012 - May 2017 | www.ariansaeed.com

- Design, develop, and maintain internal business automation systems
- Develop information systems for IT and Human Resources departments using PHP, JavaScript, and jQuery
- Collaborate with stakeholders to gather requirements and deliver business process automation solutions
- Maintain and optimize internal web applications and databases

Tech Stack:

PHP, JavaScript, jQuery, HTML, CSS, MySQL, Microsoft SQL Server, AJAX, Bootstrap, WordPress

CORE SKILLS

TypeScript, JavaScript, Node.JS, React, Next.Js, React Native, Express.JS, NestJS, TypeORM, Prisma, MySQL, PostgreSQL, REST APIs, GraphQL, WebSocket, AWS, Terraform, Docker, CI/CD, Jest, React Testing Library, Blockchain & Cryptocurrency APIs, Design Systems

SOFT SKILLS

Leadership, Teamwork, Problem Solving, Communication, Adaptability

EDUCATION

Bachelor of Science in Physics, *Payame Noor University, Sari*
